

ICD-10-CM Web Application Help Guide (Multi-Year Edition)

Updated: September 2021

Searching the ICD-10-CM on the Web! Easy as Google but All About ICD-10-CM!

Includes: Index to Diseases and Injuries, External Causes of Injuries Index, Table of Drugs and Chemicals, and Table of Neoplasms

1 ICD-10-CM on the Web contains data for several fiscal years.

- Select the fiscal year you want to search

2

- Type some text in the Search box
Index terms or parts of terms.
- Searches while you type!
Hint: Press [Enter] if you'd like the search saved to your field history.

3

- See your Results - by Volume and # of hits.
- Hint: Click the [Volume Title] to jump there.

4

- Or browse results in context

5

- Click a Code to display it in Tabular List of Diseases.
(See next page)

Displaying Codes and Instructions in the Tabular List of Diseases

1 Clicking a Code in the search results (see previous page) opens the Tabular List of Diseases with that code highlighted in yellow.

2 Hover over an icon beside a Tabular entry to see the instructions specific to that code, section, or chapter.

Includes : T78.07

- T78.0 Anaphylactic reaction due to food
 - T78.01 Anaphylactic reaction due to adverse food reaction
 - T78.02 Anaphylactic shock or reaction due to nonpoisonous foods
 - T78.04 Anaphylactoid reaction due to food
- T78.05 Anaphylactic reaction due to tree nuts and seeds
- T78.06 Anaphylactic reaction due to food additives
- T78.07 Anaphylactic reaction due to milk and dairy products**
- T78.08 Anaphylactic reaction due to eggs
- T78.09 Anaphylactic reaction due to other food products
- T78.1 Other adverse food reactions, not elsewhere classified
- T78.2 Anaphylactic shock, unspecified
- T78.3 Angioneurotic edema
- T78.4 Other and unspecified allergy
 - T78.40 Allergy, unspecified
 - T78.41 Arthus phenomenon
 - T78.49 Other allergy
- T78.8 Other adverse effects, not elsewhere classified

Legend

- Notes
- Includes
- Use Additional Code
- Code First
- Code Also
- Use 7th Character
- Excludes 1
- Excludes 2

Tip: To see an explanation of an instruction, hover over its icon in the **Legend**.

Displaying codes directly in Tabular List of Diseases

CDC Centers for Disease Control and Prevention

National Center for Immunization and Control

Fiscal Year:

Enter Search Term(s):

Find code in Tabular:

Find codes directly in the Tabular List of Diseases without first searching the Indexes and Tables.

1. Type the code in the *Find code in Tabular* text box.
2. Click the *View* button – or press Enter.
3. The Tabular window will open to display the code.

Tabular List of Diseases: T78.02

Legend

CHAPTER 19: Injury, poisoning and certain other consequences of external causes (S00-T88)

Other and unspecified effects of external causes (T66-T78)

T78 Adverse effects, not elsewhere classified					
T78.0 Anaphylactic reaction due to food					
T78.00 Anaphylactic reaction due to unspecified food					
T78.01 Anaphylactic reaction due to peanuts					
T78.02 Anaphylactic reaction due to shellfish (crustaceans)					
T78.03 Anaphylactic reaction due to other fish

Text is searched simultaneously in:

- Index to Diseases and Injuries
- External Causes of Injuries Index
- Table of Drugs and Chemicals
- Table of Neoplasms

The search looks for text, not words, so partial matches work.

- Search results show the main term and all sub-terms where the search text is found.
- The search text does not have to be in the main term.

- If the search text is found in a main term (Whooping cough in this example) the main term and all its sub-terms are displayed.
- The search text does not have to be in any of the sub-terms.

CDC Centers for Disease Control and Prevention
 CDC 24/7: Saving Lives, Protecting People™

National Center for Health Statistics – ICD-10-CM

Fiscal Year: FY2021 - includes January 2021

Enter Search Term(s): **dacry**

Disease Index **27** External Causes **0**

Index to Diseases and Injuries

- o **Dacryoadenitis, dacryadenitis** H04.00
 - acute H04.01
 - chronic H04.02
- o **Dacryocystitis** H04.30
 - acute H04.32
 - chronic H04.41
 - neonatal P39.1
 - phlegmonous H04.31
 - syphilitic A52.71
 - syphilitic A52.71 congenital (early) A50.01
 - trachomatous, active A71.1
 - trachomatous, active A71.1 sequelae (late effect) B94.0

If you don't remember the exact spelling of a term, type what you know.
 For example, to find *Dacryoadenitis* just type 'dacry'

If you were really looking for *Dacryocystitis* you will find that, too.

Hint: Save Searches as Favorites/Bookmarks

You can save searches as Favorites (Internet Explorer) or Bookmarks (most other browsers).

1. Perform a search
2. Type Control-D
3. Give the bookmark / favorite a name if you wish.
4. Save

Enter Search Term(s): **syndrome**

Disease Index **3190** External Causes **1**

Index to Diseases and Injuries

- o Aarskog's **syndrome** Q87.19

Avoid searching for common words that return too many results.

National Center for Health Statistics – ICD-10-CM

Fiscal Year: FY2021 - includes January 2021

Enter Search Term(s): **Aarskog**

Disease Index **1** External Causes **0**

Index to Diseases and Injuries

- o **Aarskog's syndrome** Q87.19

Instead, make the search as specific as possible.

Navigation and History

Back and Forward

Your browser's Back and Forward buttons will work:

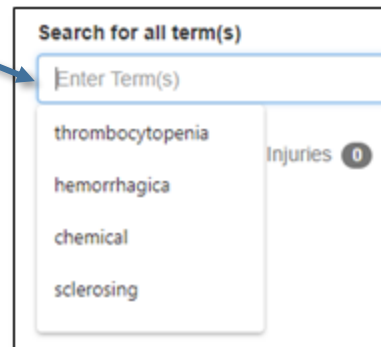

- Click the Back button to perform a previous search again.
- Once you have clicked Back, click Forward for the same purpose.

Using Form History to recall previous searches

You can also use your browser's Form History feature to recall previous searches.

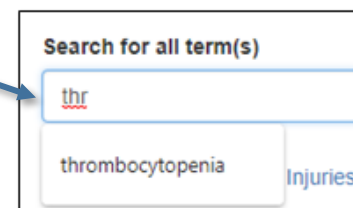

1. Ensure you have your browser set to allow form field history.
Note: different browsers have different ways of enabling form field history. Please consult your browser's settings or documentation.
2. When performing a term search, you must hit the Enter key to store the search text in form history.
3. Searching directly for a Tabular code works whether you press the 'View' button or Enter key.
4. Once there is History you can:

Click twice in the 'Search...' or 'Find Code...' field to see the whole history.

The screenshot shows a search interface titled "Search for all term(s)". Below the title is a text input field containing "Enter Term(s)". To the right of the input field is a button labeled "Injuries" with a "0" next to it. Below the input field is a list of search history terms: "thrombocytopenia", "hemorrhagica", "chemical", and "sclerosing".

Put the cursor in the field and start typing. The field will autocomplete from the history.

The screenshot shows the same search interface as above. The text input field now contains "thr" and is highlighted in red. Below the input field, the search history term "thrombocytopenia" is shown as an autocomplete suggestion. The "Injuries" button is still present to the right.

Printing

You can print either the 1) **results of a search** you performed, or 2) the **Tabular information** that pops up when you click or search for a code.

How to Print

1. Display what you wish to print, either:
 - a. **Search Results:** Perform a search. Then click the Print link (or press Ctrl-P)
 - b. **Tabular code:** Click a code in your search, or use “Find code in Tabular” to search for a code. Then press Ctrl-P. There is no Print link when the Tabular dialog is displayed.
2. Your browser's Print dialog will appear:
 - a. *Optional:* Confirm print destination or other options
 - b. Click the **Print** button

The screenshot shows the National Center for Health Statistics - ICD-10-CM web application. The search results page displays a list of medical conditions under the heading "Index to Diseases and Injuries". The search term "more" is entered in the search box, and the code "S98.22" is found in the Tabular section. A print dialog is overlaid on the right side of the screen, showing the print destination as "Brother MFC-7860DW", the number of pages as "All", and the number of copies as "1". The print dialog also includes a "More settings" dropdown menu and "Print" and "Cancel" buttons.
